

# Common Sense Project Management™ for Oil and Gas Industries

17 - 18 May 2004  
JW Marriott  
Kuala Lumpur  
Malaysia

*An interactive training experience for engineers, managers, programmers, technologists, and staff in the oil and gas industry.*

### **A Certificated Course of Study**

*How to organise and budget ANY project in 3 hours or less and manage the time it takes to manage the projects.*

Workshop Leader:  
**Mike Rounds**

MSEE, Associate Professor, University of California,  
and the creator of this Copyrighted course and Author

# Common Sense Project Management™ for Oil and Gas Industries

Because today's world of oil and gas changes at a blinding speed, your projects must be effectively managed in order to survive.

Organising and managing your projects is the key element that determines success or failure but because most of the systems used in used in the oil and gas industry are adaptations of super-complex military-aerospace systems, they are virtually impossible to use for most projects.

**Stop wasting time using cumbersome systems that are ineffective and change to a method that lets you manage the project instead of managing the process!**

Efficient management of your projects is mandatory to guarantee that they're done on time and within budget, factors that are critical to the overall strategy of your organisation's existence.

Since oil and gas projects do not manage themselves, organisations rely on the skills and resourcefulness of employees to manage and control a variety of projects while attending to their other duties and responsibilities.

In some cases, one person may be managing several projects simultaneously and without proper project management systems, projects are often delayed and completed long after the original planned delivery date.

This "juggling" of responsibilities has given rise to the need for an efficient and easily implemented system for managing all forms of projects without creating a burden on the responsible individuals.

**Common Sense Project Management™** is the answer to oil and gas's everyday projects. It's a simple, easy to follow programme that's **guaranteed** to teach you how to organise, budget, plan, monitor and control your projects.

Just about everything involved in the oil and gas industry, from exploration through pipeline maintenance, benefits from project management. Once you've learned these simple, yet effective techniques, you'll have **more time and less stress** on all your projects.

This seminar teaches participants simple techniques to accomplish more and gain control in spite of multiple assignments, increased workloads, and the need to maintain priorities and meet deadlines. Topics include:

- Focusing on results (not just completing tasks)
- Positive ways to deal with competing priorities and
- Maintaining personal motivation when under pressure
- Selecting the jobs that count.
- Keeping control over concurrent projects

**The emphasis is on planning, organising and prioritising strategies that work.**

The **Common Sense Project Management™** system taught in this workshop works with and for you to provide integrated solutions, ensuring your project team has the tools it needs to stay focused and get the job done – on time and in budget.

The workshop focuses on the employee who has moved, or is about to move, into a project management position or who is assuming project management responsibility. The course will emphasize maximising time efficiency resource planning and problem solving

The training session includes an interactive planning session that will result in a completed project task schedule and budget. Participants are encouraged to bring their own projects for inclusion in this session.

## Programme Agenda

1. Background and definitions of project Management
  - So, what is project management - really?
  - How does project management differ from other management principles?
  - How did it develop?
  - Rate Yourself As a Project Manager
2. The Benefits of Planning
3. The Dangers in Planning
4. So what? [Why?] Manage projects?
  - Target? [What?] What do we want to accomplish?
  - Time? [When?] How soon do we need it completed?
  - Budget? [How; Where; Who] How do we accomplish it? Where do we do it? Who's going to do it?
5. The "**Speed Schedule™**" method of planning a project
  - Budgeting Tips
  - Planning
  - Scheduling
  - Controlling
6. Setting up a reporting system
7. Terminating the Project
8. Different Ways To Manage A Project
9. How to determine priorities for multiple projects?
10. Sample project management exercise
11. Time management techniques
12. Meeting management techniques
13. How to identify and deal with difficult people who are an impediment to your plans?

## Who Should Attend

This programme is designed for any person who has the responsibility of seeing that a project is completed on time and within the budget.

Directors, managers, project managers, team leaders, department heads, project engineers, production managers, software programmers, consultants, and group leaders will all benefit equally from learning how to quickly and efficiently organize and manage any project thrust upon them.

# Managing Projects, Priorities, and Deadlines in the Oil and Gas Industry

*An interactive Training experience for engineers, managers, programmers, technologists, and staff in the oil and gas industry.*

## A Certificated Course of Study

*How to organise and budget ANY project in 3 hours or less and manage the time it takes to manage the projects.*

This programme is **GUARANTEED** to be part of the solution, not part of the problem!

Conventional project planning systems developed for the Military/Aerospace communities are **far too complex** for most of our normal planning and budgeting needs.

**Stop wasting your time** and resources using project-planning methods that are cumbersome and ineffective and start using a system that lets you manage the project instead of the system.

**Common Sense Project Management™** provides the answer by training people to use a simple, easy to follow programme that's guaranteed to teach you how to organize, budget, plan, monitor and control your projects.

Once you've learned these simple, yet effective techniques, you'll have **more time and less stress** on all your projects.

The training programme consists of **both lecture and actual planning sessions**. ALL elements will include interactive feedback and discussion to ensure that the participants leave with a thorough understanding of the process and are able to employ it **IMMEDIATELY!**

Once you've learned these simple, yet effective techniques, you'll have **more time and less stress on** all your projects.

The training programme consists of both lecture and actual planning sessions. ALL elements will include interactive feedback and discussion to ensure that the participants leave with a thorough understanding of the process and are able to employ it **IMMEDIATELY!**

- The first module explains the process, tools, and how to use them.
- The next module includes "hands-on" participation where several people's projects will be outlined, detail, and planned.
- The third segment trains the participants in tips and techniques for managing time including how to effectively schedule and manage meetings and interruptions.
- The fourth module includes section on dealing with difficult people and obtaining cooperation in the planning and implementation of projects.

**PLEASE NOTE: For maximum benefit, attendees are encouraged to bring an actual project to be managed with them. Those selected will leave with a complete working timetable and budget that can be taken and implemented the same day.**

This programme includes complete guideline notes for simply and easily managing projects and reproducible forms for planning future projects.

## Who is Mike Rounds

The instructor is Mike Rounds, MSEE, Associate Professor, University of California, and the creator of this Copyrighted course.

Mike Rounds was a former aerospace project manager and Director of a Fortune 500 Company presents this programme and will share his copyrighted system based on years of first-hand project management experiences. Mike is famous for making the complicated simple – and this programme is no exception. When you leave here, you'll know what to do and how to do it.

He's an Associate Professor for the University of California, and his ability to blend knowledge, humor, and technology brings him before all sizes and interests of audiences, over 150 times a year, in both the US and six foreign countries.

Unlike some speakers who merely talk about a subject, Mike actively lives his topic. His diverse background, combined with a passion for teaching and platform dynamics, guarantees a programme that you'll love.

Mike's listed in the "Who's Who In Professional Speaking" and has earned kudos from organizations like the Harvard School of Business, Blue Cross®, hundreds of colleges and universities, and over 250 radio talk shows as one of the leading authorities in his field.

For more information on Mike, please visit him at [www.MikeRounds.com](http://www.MikeRounds.com) and [www.RoundsMiller.com](http://www.RoundsMiller.com)

## Our Media Partners

**eGuide** is a regional online business directory with core strengths in online advertising, strategic marketing efforts and e-commerce solutions for SMEs. The eGuide Directories provide users with online information on products & services, contact details of business entities in various industries across the Asia Pacific Region. We have a listing of about 80,000 businesses in Singapore, and more than 180,000 businesses in Malaysia, 150,000 businesses in Thailand, 1 million businesses in Australia, 22,000 businesses in Vietnam and 65,000 businesses in Indonesia. For more information, please log on to <http://www.eGuide.com.sg>

**EnergyAsia** is the brand name of several publications produced by The Strategist Pte Ltd, a Singapore-based publishing house and consultancy.

Founded in 1993, The Strategist specialises in providing news, data and analysis on Asia's oil, gas, power, petrochemical, chemical and environmental industries. EnergyAsia's four publications include:

- EnergyAsia Report (hard copy)
- EnergyAsia Monthly (in PDF)
- EnergyAsia Weekly. A weekly email of oil, gas, power and petrochemical news in Asia.
- EnergyAsia Daily in [www.EnergyAsia.com](http://www.EnergyAsia.com). Daily oil, gas, power and petrochemical news.

The Strategist has also produced a stable of books and special reports on Asia's oil, power, petrochemical and environment industry.

EnergyAsia publications are read by senior people and planners in the oil, gas, power, petrochemical and marine industries in Asia. Government agencies and financial institutions involved in financing energy projects are also among our subscribers.

**The Plant Maintenance Resource Center** is the leading on-line resource for Maintenance and Reliability professionals, with links to over 700 articles on Maintenance-related topics, listings of several hundred Maintenance-related software packages, including Computerised Maintenance Management software, reliability modeling software, spare parts optimization software and more. A regular email newsletter contains informative articles and other information of interest to Maintenance professionals. An active discussion forum allows members to share experiences, ask questions of experts and their peers, and keep abreast of advancements and best practices. And all of this is free of charge.
